PROFESSIONAL PROFILE

Senior Python Developer and Data Engineer with 7+ years of professional experience in backend engineering, data pipelines, process automation, and production analytics/reporting systems in SaaS/internal platform environments. Expert in building scalable RESTful APIs (FastAPI, Flask, Django) and event-driven/streaming data pipelines (Kafka). Strong proficiency in Python for ETL/ELT, orchestration, and large-scale data processing (Pandas, PySpark). Hands-on with PostgreSQL, MongoDB, Docker, AWS (Lambda, AppRunner, etc.), CI/CD (Jenkins/GitHub), and hybrid cloud setups. Proven track record supporting business-critical analytics, real-time alerting, and hardware-integrated systems. Passionate about fintech, digital assets/crypto, and capital-markets solutions. Excellent leadership, Agile/Scrum, and cross-functional communication skills. Fluent in English and Spanish.

TECHNICAL SKILLS

- **Core Languages & Frameworks:** Python (advanced – data pipelines, automation, orchestration), FastAPI, Flask, Django, Advanced SQL (modeling, transformations, performance tuning), Node.js/JavaScript/TypeScript (working proficiency via React/JS frontend exposure)
- **Data Engineering & Streaming:** Kafka (real-time/event-driven pipelines), ETL/ELT processes, PySpark, Pandas, NumPy, TensorFlow/PyTorch (ML support), Airflow-like orchestration (via Jenkins/CI pipelines & custom schedulers)
- **Databases & Storage:** PostgreSQL (strong – modeling & tuning), MongoDB (NoSQL, schema evolution), MySQL, Redis
- **Infrastructure & Cloud:** Docker (containerization), Kubernetes exposure, AWS (Lambda, CloudWatch, AppRunner, X-Ray), GCP, Azure, hybrid environments
- **Tools & Delivery:** Git/GitHub (PRs, reviews, CI/CD), Jenkins, Pytest, SonarQube, Prometheus, Splunk, JIRA workflows, Claude AI tooling familiarity
- **Other:** HTML/CSS/JS/React, Selenium, BeautifulSoup, Clean Code, Design Patterns, Automated Testing, Agile/Scrum

PROFESSIONAL EXPERIENCE

■ **EY (Ernst & Young) – Media Infrastructure Engineer- EY wavespace Data & AI hub**
Madrid, Spain | October 2025 – Present

- Designed and maintained ETL/ELT pipelines using Python and SQL for structured and financial datasets.
 - Built real-time streaming pipelines with Kafka for event-driven processing and alert systems.
 - Developed and optimized PostgreSQL queries with focus on performance tuning and schema evolution.
 - Supported production reporting and analytics systems used by business and financial stakeholders.
 - Deployed containerized data services using Docker in AWS environments.
 - Manage Linux servers, Docker containerized services, and NAS for high-availability data & AI workloads in production analytics environments.
 - Ensure data integrity, backups, and monitoring for business-critical reporting and AI-driven insights.
-

■ **Ricoh Spain – Senior Python / Backend Developer**

Madrid, Spain | February 2022 – October 2025

- Lead development of highly scalable RESTful microservices with FastAPI, integrated in critical corporate environments for AV room control.
- Over 2 years working with production APIs, focused on clean design, modularity, and component reuse.
- Cloud deployment and service management using AWS (Lambda, AppRunner) and hybrid AWS-GCP integrations.
- Integration of physical devices through protocol programming (RS-232, TCP/IP, IR), providing a full hardware/software control perspective.
- Coordination with IT and AV teams for meeting room automation, integrating solutions via Cisco Control Hub.

■ **Telefónica Spain – Python Developer (Cloud & Data)**

Madrid, Spain | October 2021 – February 2022

- Developed backend microservices using Flask, integrating external services with secure authentication and production deployment.
- Automated large-scale data processing using Python and Pandas.
- Participated in CI/CD pipelines with Jenkins, Git, and Pytest, ensuring quality and continuous delivery.
- Worked in hybrid AWS and GCP environments, including environment configuration, testing, and deployment of APIs across both platforms.

■ Intelidat – Backend Developer (Python, FastAPI, AWS)

Remote | May 2019 – September 2021

- Designed and developed backend microservices in FastAPI, with decoupled and scalable architectures managed through Docker containers.
- Connected databases using SQLAlchemy, improving access efficiency and system maintainability.
- Automated deployments on AWS (Lambda, AppRunner), and implemented CI with Jenkins and GitLab CI.
- Monitored production services using Prometheus and Splunk to ensure real-time performance.

■ Innova Service – Python Developer / Data Scientist

Panama | March 2017 – May 2019

- Led the design, architecture, and development of complex backend systems for LegalTech and HealthTech solutions, using Python and Flask with modular, decoupled, and scalable microservices.
- Actively participated in the technical definition of products, from requirements gathering to delivery, applying clean design principles and engineering best practices.
- Implemented supervised Machine Learning models and NLP techniques for fraud detection, court outcome prediction, and automatic report generation.
- Developed and integrated intelligent legal chatbots, trained with specific corpora and connected to internal systems.
- Designed real-time data processing pipelines with Kafka, generating instant clinical alerts from medical sensor inputs.
- Automated processes for medical billing, document classification, and clinical data analysis to support decision-making and reduce human error.
- Extensive use of Docker for containerization, service orchestration, automated testing, and deployment in controlled environments.
- Direct collaboration with doctors, lawyers, and key stakeholders to translate business needs into effective technical solutions.
- Delivered data solutions for banking-sector initiatives, including collaboration with Asociación Bancaria de Panamá.

EDUCATION

- Full Stack Developer – 4Geeks Academy
2023 - 2024 | Madrid, Spain
- Systems Engineering – Universidad Latina de Panamá
2000 - 2004 | Panama

LANGUAGES

- Spanish: Native
 - English: Advanced
-

CERTIFICATIONS

- IBM Data Science Professional Certificate
- PCAP: Associate Python Programmer - Cisco Networking Academy
- Data Analyst - Google / Coursera
- Crash Course on Python - Google / Coursera
- Big Data Architecture - Grupo Colón IECM
- Electronic Signature and Internet Security - Grupo Colón IECM
- IT Security Management - Grupo ATU
